

Arbor Creek™

WHERE QUALITY IS A WAY OF LIFE

Arbor Creek specializes in precision millwork which has made us a leader in 1/2" and 3/8" wood flooring. Beginning production in 1998 we rapidly gained a loyal following. A professional flooring contractor, amazed at the fit and tolerance of our products, asked his distributor "Who are these guys?". We're Arbor Creek and we only produce 1/2" and 3/8" solid wood flooring.

Why only 1/2" and 3/8"?

- 🌿 The wear layer (area above the tongue) for 1/2" flooring is virtually the same as that of 3/4" flooring
- 🌿 Protects our forest resources by using less material
- 🌿 Because of less mass there's less contraction and expansion, more stability, less squeaks
- 🌿 Easier to install—nail down or glue down (following manufacturer's recommendations)
- 🌿 Ideal for remodeling—easy installation and less floor height

Red Oak and White Oak flooring.

Arbor Creek™

WHERE QUALITY IS A WAY OF LIFE

RED OAK and WHITE OAK are the quintessential flooring woods. Both are wear resistant and ideal for high traffic areas. White oak is particularly resistant to rot and moisture. Both are easy to sand and take all types of stains and finishes. They nail well, resisting splitting, and have excellent holding properties.

White oak is actually more of a caramel color whereas red oak is typically pinkish red to light brown. Oak grain has the warmth and beauty that has made it a favorite around the world.
